PROFESSIONAL SUMMARY

Final-year Computer Science student and full-stack software engineer with hands-on experience building AI-powered products, LLM applications, RAG systems, backend services, and data-driven platforms. Experienced across Node.js, Python, React, PostgreSQL, FastAPI, REST APIs, authentication, vector search, and AI tooling. Strong problem-solving focus with projects spanning AI security, career intelligence, and financial technology.

EDUCATION

B.Tech in Computer Science

KIET Group of Institutions; 81.2%

Expected 2027

Ghaziabad, India

EXPERIENCE

Software Engineer Intern

Nov 2025 – Jun 2026

COE Security LLC

Remote

- Engineered an AI auditing platform for ML models and LLMs covering model risk, privacy, bias, drift, and security evaluation.
- Developed backend evaluation workflows and performance metrics for automated model auditing and risk analysis.
- Worked on prompt-injection testing, deterministic security rules, and AI safety evaluation pipelines.

Cybersecurity and Digital Forensics Intern

Apr 2025 – Jun 2025

Cyber Secured India

New Delhi, India

- Performed Windows digital-forensics assessments and developed Python automation scripts for evidence and artifact retrieval.

PROJECTS

Job Tracker AI | Node.js, Express, React, PostgreSQL, Gemini, Socket.io

Jul 2026

- Built an AI-powered career platform that analyzes resumes against job descriptions and generates personalized learning plans using LLMs.
- Implemented JWT and Google OAuth authentication, real-time Socket.io workflows, and RESTful backend APIs.
- Integrated Google Gemini for AI-driven analysis and Three.js for interactive product experiences.

Paper Trading Platform | Node.js, Express, PostgreSQL, REST APIs

Jul 2026

- Developed a realistic financial-market simulator supporting portfolio management, order execution, and transaction workflows.
- Built a concurrency-safe trading engine using SQL transactions, explicit row locks, and decimal.js for accurate financial calculations.

RAG Vector Search Engine | Python, Embeddings, Vector Database, Cosine Similarity, LLMs

2026

- Built a retrieval-augmented generation pipeline that stores document embeddings and retrieves semantically relevant context for LLM applications.
- Implemented embedding-based vector search using cosine similarity to improve context retrieval and reduce irrelevant LLM responses.

AI Model Security Platform | Python, FastAPI, React, LLM Security

Dec 2025 – Apr 2026

- Developed an AI governance SaaS for monitoring model privacy, bias, drift, hallucination, and security risks.
- Engineered automated audit workflows for prompt-injection testing, PII detection, deterministic pattern matching, and risk scoring.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL, Bash

AI/LLM: LLMs, RAG, Embeddings, Vector Search, Vector Databases, Prompt Engineering, Google Gemini API, AI Agents, AI Automation

Backend: Node.js, Express.js, FastAPI, REST APIs, PostgreSQL, JWT, OAuth 2.0, WebSockets, nginx

Frontend: React.js, Tailwind CSS, Three.js, HTML, CSS

Data/Cloud: PostgreSQL, SQL, Data Analysis, Analytics, AWS, EC2, Git/GitHub

Core CS: Data Structures and Algorithms, OOP, DBMS, Computer Networks, Software Engineering

Platforms/Tools: Linux, Windows, Git, Docker, Postman

ACHIEVEMENTS

- Cyber Hackathon 2025:** National Finalist among 1000+ applicants; **Innotech KIET 2024:** Finalist.
- Leadership:** Vice Chair, ACM-KIET Chapter; Runner-up, IEEE SSH 2024 Phase-1.

CERTIFICATIONS

- Machine Learning for Digital Forensics – CDAC — Cyber Threat Management – Cisco — CCNA: Introduction to Networks
